

PAINS IN YOUR BACK?

They are oftentimes symptoms of overworked vital organs and should be regarded as a warning. Generally the digestive system may be disordered and then you are most likely to find the ideal measure of relief in Tanlac, the celebrated tonic and system purifier that has brought health and happiness to so many hundreds of thousands all over the United States, Canada and Mexico.

Tanlac is sold by all good druggists

STATE AIDS TEACHERS

The State's share of the cost of maintaining the 69 county teacher training schools in Kentucky for white teachers and prospective teachers this summer will amount to \$27,884.50, it was stated by Chas. D. Lewis, State director of teacher training. The counties will pay the difference between that amount and \$41,268.50. Mr. Lewis said that 3,543 teachers and prospective teachers are enrolled in these schools. The eight training schools for negro teachers will cost the State about \$4,000.

ALL KENTUCKY CONGRESSMEN REENTER FOR ELECTION

With one exception, all of the present Congressmen from Kentucky are candidates for renomination in the primaries August 5. The exception is Congressman Charles F. Ogden, Republican, of Anchorage, in the Fifth District, and as a result of his refusal to run, Maurice L. Thatcher, former Governor of the Panama Canal Zone, will be opposed in November by Kendrick R. Lewis, of Louisville, on the Democratic side.

In six of the other ten districts in the State the present Congressmen have no opposition in the primaries. Summed up, the Democrats have four contests and the Republicans have six.

Dr. Waddell's Pile Remedy

SO SAY WE ALL OF US!

(Louisville Herald)

We know of a certain newspaper that is reputed to have paid \$5,000 for the Kaiser's memoirs. Thereupon it proceeds to cut down expenses by reducing its local staff. "It's a h— of a note," said one of the reporters "let out," "that five years after the war any writing that comes from the Kaiser should cost ten Americans their jobs. To h— with the Hapsburgs and the Hohenzollerns!"

QUEER HAPPENINGS IN THE DAY'S NEWS

JACKSON—Falling from a log car at Buckhorn and breaking his arm, little Ollie Hayes had to take sixteen miles to Quicksand before the bones could be set. Infection developed and he is in a critical condition from blood poisoning at a hospital.

SOMERSET—The body of Miss Hazel Lewis, daughter of Owen Lewis, of Greenwood was brought here for burial. She was killed at Chattanooga when a tire thrown by an automobile tore through a fence and struck her, death being instantaneous.

CARROLLTON—Little Clyde William Carter underwent an operation in which one of the bones in his leg from ankle to the knee was taken out. Some weeks ago he suffered severely from a stone bruise on his foot, and physicians believe that the infection was communicated to the bone.

GRAYSON—A sunstroke suffered recently by Prof. W. R. Calloway, who has taught the colored school here for many years, resulted in loss of his reason. He was committed to the Lexington State Hospital.

FULTON—Two years ago Milford Olsen, son of Mr. and Mrs. C. V. Olsen, of Spooner township, swallowed a shingle nail. The nail could not be found and as it did not cause the child any discomfort, the incident was forgotten. Recently he was seized with a violent bit of coughing and he vomited up the nail.

SHADYSIDE, O.—A big windstorm dislodged a bird's nest from a rambling rose bush in the yard at the home of Michael Mochary.

The nest, abandoned some time ago by a red bird, contained a \$20 bill, pages from a Bible and parts of postal money orders from Cleveland, Kenwood, Freeport, Fairpoint, Powhatan and Canton, O.; Wheeling, W. Va.; Danti, Va.; Gray, Ind., and Winslow, Ariz.

Mochary expressed belief that the articles might have been placed in the bush by thieves who failed to return for them.

"SAFE INVESTMENTS"

Recently Raymond Hitchcock was credited with giving a "sure fire" system for "beating" the races. It was not to bet on them. Now comes the United States Treasury Department with a "sure fire" investment. The department advises buying Treasury Savings Certificates.

These certificates are sold at \$20, \$50 and \$100 and in five years are paid off at \$25, \$100 and \$1,000, respectively. This is 25 per cent in five years; there are no taxes to pay on them and as the name of each owner is recorded in Washington, the loss of the certificate itself does not mean the loss of the investment. And Uncle Sam stands behind the guarantee.

Both of the foregoing systems are unbeatable in their respective fields and might well be "twinned up" for the best results. What is saved by taking Mr. Hitchcock's advice may be made into insurance against ill fortune in years to come by accepting the advice of the Treasury Department.

NATIVE BIRDS INCREASING

Reports from every section of Kentucky indicate that there is a considerable increase in the number of useful birds, which is ascribed to the protective legislation adopted by the Federal Government and practically every State.

Particularly is the increase observed in the cardinal, robin, thrush and bluejay, which have invaded even the large cities, where they are now to be seen in great numbers. Only a few years ago the sight of some of the species was a rarity.

It was the common belief that the English sparrows had driven the other birds away, but the constant increase in the number of song birds since the enactment of protective legislation disposes of the fallacy. All of this goes to show that intelligent conservation is doing much to restore conditions existing before the era of wanton waste and destruction. It has been only a few years since bird egg collection was a popular fad not only among boys, but among many grown-ups and this fad took enormous toll of bird life. This is now prohibited by law, as well as the confinement of any American song bird. Formerly it was a common sight to see the cardinal and mocking bird in captivity, but now these birds delight the ear with their notes unhampered by confinement in a cage.

Driven to Extremity.

Kansas Paper—There's a girl in our town wearing a handsome diamond ring and is deathly afraid of burglars. At night when she retires she slips said ring on her little toe for safety.—Boston Transcript.

MILLION DOLLARS IS PRESBYTERIAN AIM

Local Presbyterians have received notice of the appointment of Dr. I. C. Acheson, of Danville, and S. French Hoge, of Frankfort, on the executive committee in charge of the Presbyterian movement for Christian education in which \$1,000,000 is to be raised for the Presbyterian institutions of this State.

Actual solicitation has started in the eastern section of the State, after preliminary preparations and reports received indicate that the goal will be reached within the time limit. The work thus far has been outside of the larger cities by campaigns, and will open in the larger places shortly.

The needs of nine institutions covered in the movement have been prepared by the heads of the institutions and were set forth in statement recently made by those in charge of the work.

The statement shows that endowment is the main need of the schools, colleges and the orphanage in order that they be placed on a firm financial basis.

Mr. Garrett S. Jefferson, of the local church, is looking after the advertising end and a few other details for Bourbon county.

Catarrhal Conditions

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the blood upon the mucous surfaces of the system. HALL'S CATARRH MEDICINE gives the patient strength by improving the general health and assists Nature in doing its work.

BOILING LAVA FOUND AT DEPTH OF TEN FEET

Borings into Kilauea volcano, island of Hawaii, recently started under the auspices of the Hawaiian Volcano Research Association, have resulted in the finding of live steam registering a temperature of 90 degrees centigrade at depths of only about ten feet below the surface of the lava.

It is planned to extend the boring operations to cover the entire volcanic area in the vicinity of Kilauea volcano. These places showing the greatest possibilities of power development will be selected for deeper and more extensive borings.
